

Introduction

Carrier Commitment functionality allows the Hub/Shipper to define the number of loads/tenders that a Carrier can support on a given day of the week for a specific Lane and Equipment. This is configured using the Carrier Commitment screen located under the following menu: Contract Mgmt -> Carrier Commitment. Prior to this functionality, the system assumed that the Carrier had unlimited capacity while tendering and it was therefore up to the Carrier to reject a tender if they did not have capacity.

If a Carrier is over-committed then this functionality will prevent the system from sending him a tender.

Configuring the Carrier Commitment Functionality

- 1. Login to the One Network System.
- 2. Select Contract Mgmt -> Carrier Commitment.

- 5. On this screen, the user needs to fill in the required information as follows:
 - a. Carrier field auto complete field with search icon; this is the name of the Carrier
 - b. Effective Dates fields the date range this Carrier Commitment is effective
 - c. Equipment field drop-down list of equipment types for this Carrier Commitment
 - d. Lane field the lane (i.e. Ship From and Ship To) for this Carrier Commitment. Note if Lanes have not been created, the user can specify the Ship From and Ship To by selecting the New Lane link next to this field.
 - e. Day of the Week (Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday) and associated count for that day enter the commitment count by day of the week; a zero value indicates no tenders for that day of the week.

6. After the information has been entered on this screen, press the **Create** button to save the information.

7. The following shows how this Carrier Commitment information would be displayed on a Shipment's Tender Plan screen if there is no commitment available for a Carrier.

Note – this would only be displayed for the first Carrier in the Tender Plan that would be the first to receive the tender. When the tender is sent to subsequent Carriers on the Tender Plan, the system checks to see if they are over-committed at that time and if so, it would not tender to them but would proceed to the next Carrier in the Tender Plan. This is because the Carrier Commitment can change for subsequent Carriers in the Tender Plan due to other shipments being tendered and accepted by Carriers.

			Search Search	숙 <u>Clear</u>	X Close

12. Enter the desired Date Range and Carrier in their respective fields and perform a search by selecting the **Search** link. Note – Equipment can also be entered as a filter field to perform the search.

13. On the Carrier Commitment Capacity search results screen, there will be a count for the following: Capacity, Confirmed, and Unconfirmed. The Capacity count will be the value that was set on the Carrier Commitment screen. The Unconfirmed count will be the count of shipments to be tendered that have that Pickup Start Date– this count will increment when the Tender Plan is created; this count is decremented if the Tender Plan is cancelled prior to the tender being Accepted, Rejected or Expired. The Confirmed count will be the count of shipment tenders accepted by the Carrier for that Pickup Start Date. If over-commitments were overridden by the user, that count will be reflected in the Unconfirmed/Confirmed counts.
